

Kartik Upadhayay

Full Stack Developer (PHP | Laravel | CodeIgniter | React | Java | Spring Boot | MySQL | Linux)

📍 Noida, India ✉ kartiku03@gmail.com ☎ 070885 86048 🔗 [kartik-upadhayay-77b722148](#) 🌐 [kartik08-it](#)

Professional Summary

Full Stack Developer with 2.8+ years of experience building scalable SaaS, product-based, and service-based web applications using Laravel, React, TypeScript, Java, Spring Boot, and CodeIgniter. Experienced in developing CRM, ERP, HRMS, examination, and real-time monitoring systems with expertise in REST APIs, authentication systems, RBAC, WebSockets, database optimization, and enterprise application development. Skilled in delivering secure, high-performance, and scalable solutions across backend, frontend, and cloud-ready architectures.

Skills

Backend: PHP, Laravel, CodeIgniter (HMVC), Java, Spring Boot, REST APIs, SOAP APIs, MVC Architecture, Authentication & Authorization

Frontend: React.js, TypeScript, JavaScript, HTML5, CSS3, Material-UI, Responsive UI Development

Database: MySQL, Query Optimization, Database Design

Tools: Git, GitHub, Linux, Docker, Postman, Agile/Scrum, API Integration

Architecture & Concepts: RBAC, Two-Factor Authentication, SaaS Applications, CRM, ERP, HRMS, RBAC, WebSockets, RESTful Services,

Experience

Webverse IT, Software Developer

Noida, India

Jan 2026 – present

4 months

- Worked on service-based full-stack applications using CodeIgniter HMVC architecture.
- Worked on CRM and market research platforms with client-specific workflow customizations.
- Integrated third-party and client APIs for demand-supply workflow systems.
- Built and maintained REST APIs for external integrations and enterprise applications.
- Optimized MySQL queries and backend systems for better scalability and performance.
- Contributed to Java and Spring Boot backend modules for enterprise-level applications.
- Collaborated with cross-functional teams to deliver client-specific solutions and features.

Pioneering The Future, Software Developer

Noida, India

Sept 2023 – Jan 2026

2 years 5 months

- Worked on BlinkExam, a SaaS-based examination and assessment platform used for large-scale online examinations.
- Developed scalable product-based backend systems using Laravel MVC architecture and RESTful APIs.
- Migrated legacy SOAP APIs to REST APIs, improving performance, maintainability, and third-party integrations.
- Implemented RBAC, Two-Factor Authentication, and authentication workflows for enterprise-grade security.
- Developed responsive and dynamic frontend modules using React.js, TypeScript, and Material-UI.
- Built ERP and HRMS-related admin functionalities and workflow automation modules.
- Automated backend workflows, reducing manual effort by 40%.
- Collaborated in Agile/Scrum teams to deliver scalable production-ready features.

Projects

BlinkExam Platform (SaaS-Based Examination Product)

- Developed and enhanced SaaS-based examination platform modules for Admin and Candidate Panels.
- Built scalable Laravel APIs for examination workflows, candidate management, and assessment systems.
- Developed React.js admin dashboards with RBAC and dynamic workflow management.
- Migrated legacy SOAP services to REST APIs with backward compatibility support.
- Implemented authentication, validation, queue-based processing, and scalable API workflows.
- Built reusable email template systems for transactional communication and notifications.

Proctoring & Invigilation System

- Built real-time monitoring system using WebSockets for candidate tracking.
- Implemented role-based dynamic panels for Proctor and Invigilator (single repo, rule-based access).
- Reduced response latency by 50% and improved monitoring efficiency.

SuperAdmin Panel (Pioneering The Future)

- Developed secure admin system with RBAC and Two-Factor Authentication.
- Built scalable dashboards and system-level controls for platform management.
- Improved auditability and operational control.

CRM & Market Research Platform (Webverse IT)

- Developed full-stack CRM features using CodeIgniter (HMVC architecture).
- Integrated client APIs for demand-supply workflows in market research systems.
- Optimized database queries and backend performance.

HRMS Panel

- Developed HRMS modules for employee management, attendance, leave tracking, and payroll workflows.
- Built REST APIs using Spring Boot for HR operations and data management.
- Created responsive frontend components using React and TypeScript.
- Implemented role-based access control and authentication for HR and Admin users.
- Optimized MySQL queries and backend performance for large employee datasets.

Education

B.Sc.	D.A.V PG College , Physics, Maths, Computer Science Grade: 68%	Muzaffarnagar, U.P. 2020
12th	LJP SVM Inter College , Physics, Chemistry, Mathematics Grade: 70%	Muzaffarnagar, U.P. 2016
10th	LJP SVM Inter College , General Studies Grade: 78%	Muzaffarnagar, U.P. 2014
